

Topics Covered:

- Linux Commands cont.

Linux Commands

1. mv → moves a file from one location to another location.
2. whatis → get brief information about Linux commands.
3. grep → It searches the given file for lines containing a match to the given strings or words.
4. df → Report disk usages of file system.
5. du → Estimate files space usage.

Note: df only reports usage statistics on file systems, while 'du', on the other hand, measures directory contents.

6. sudo → It allows a permitted user to execute a command as the super user or another user.
7. passwd → It is used for changing the password. You must know the current password for the security reason.
8. history → It prints the history of long list of executed commands in terminal.
9. cal → display calendar of the present month or any other month.

Examples

1. Move myfile from downloads directory to myFolder

```
(kali㉿kali)-[~/Downloads]
└─$ ls
myfile  myFolder  test

(kali㉿kali)-[~/Downloads]
└─$ mv myfile myFolder

(kali㉿kali)-[~/Downloads]
└─$ ls
myFolder  test

(kali㉿kali)-[~/Downloads]
└─$ cd myFolder

(kali㉿kali)-[~/Downloads/myFolder]
└─$ ls
file1  myfile
```

2. Display information about command cp

```
└─$ whatis cp
cp (1)                  - copy files and directories
```

3. To write in a file using linux command

```
└─$ cat > test1
make a brief information about linux operating systems and its commands
^C
```

4. Search about a word in a file

```
└─$ grep course myfile
I take cyber security course at Elsewedy university of technology
```

5. Report disk usages of file system.

```
└─$ df
Filesystem      1K-blocks    Used Available Use% Mounted on
udev            981688        0    981688   0% /dev
tmpfs           203068      1160    201908   1% /run
/dev/sda1       81058256  9444896  67452748  13% /
tmpfs           1015336        0    1015336   0% /dev/shm
tmpfs           5120         0        5120   0% /run/lock
tmpfs           4096         0        4096   0% /sys/fs/cgroup
tmpfs           203064        56    203008   1% /run/user/1000
```

6. Measure directory contents

```
└─$ du
16 .
```

7. Display calendar of the March 1991

```
└─$ cal 3 1991
      March 1991
Su Mo Tu We Th Fr Sa
                1  2
 3  4  5  6  7  8  9
10 11 12 13 14 15 16
17 18 19 20 21 22 23
24 25 26 27 28 29 30
31
```

Exercises

1. Write Linux commands to:
 - a. Make two folders named “folder1” and “folder2” in documents directory
 - b. Make new file named “myfile” in documents directory
 - c. Move “myfile” to folder1
 - d. Show what are in documents directory and folder1
 - e. Write a paragraph in myfile and search to any word in this paragraph
 - f. Show the calendar of your birthday.
 - g. Show your history of commands
